

What's Changing in Kanopy's New Web Experience?

In spring 2022, your library's Kanopy website upgraded to a new design. This new web experience is more intuitive, responsive, and user-centered than ever before.

Our website design improvements make it easier to find films you'll love, organize your favorites, and start watching sooner. We've also worked behind the scenes to improve overall site performance in order to create a film-viewing experience that's faster and more reliable. Here's an overview of the updates coming to your Kanopy website.

Note: These changes affect only the Kanopy website, not the Kanopy mobile or TV apps.

1 New top navigation

The top navigation bar of your library's Kanopy website has been redesigned for simpler browsing, searching, and account management.

2 Improved searching and browsing

Kanopy's new search is faster and more accurate than before, with easy-to-use filters and sorting. A simplified **Browse** menu lets you pick from currently featured categories and genres.

3 New “Continue Watching” shelf

You’ll find titles that you’ve started watching on your new **Continue Watching** shelf, located both on the homepage and under **My Lists**. The **My Lists** tab also includes your watchlist and any custom playlists you’ve created.

4 Clearer play credit counter (public libraries only)

You can see how many play credits you have left (out of your total monthly play credits) using the play credit counter near the top-right corner of the website. Hover over the play credit counter to see more information about play credits.

5 New time remaining indicator

Titles you've started watching will display the number of hours remaining until your play credit expires in the top-right corner.

6 Prominent public performance rights indicator

A PPR icon appears near the top of the details page for films that can be shown at free public events hosted by your library.

7 New “Live Transcript” tool

You can click a new “enable transcripts” icon while playing a title to bring up a live transcript. The live transcript plays alongside the film and allows for easy excerpting.

8 Simplified account menu

A simplified account menu makes it easier to manage your account, link other devices to your account, and find support. You can edit your account details, add or remove library memberships, and set up parental controls under **My Account**.

For additional assistance, visit our support articles at help.kanopy.com or ask a specific question at kanopy.com/contact.
